Кеу хос	abulary
light	We can see objects
Ø	because our eyes can
	sense light.
dark	Darkness is the
	absence of light.
light	Some objects emit
source	their own light and
	are sources of light:
	the sun, lightbulbs
	and candles are
	examples.
transparent	A material that is
•	completely see
	through so all the
	light can pass
	through.
translucent	A material that lets
	some light through
	but not all of it.
opaque	A material that light
	cannot pass through.
	You cannot see
	through it.
shadow	These are formed
	when an object blocks
	light.
reflect	When light bounces
	off a surface.
mirror	A sheet of glass or
	metal that reflects
	light.

**ECM** 

Year 3- Light

Signi	ficant scientist
Justus von	Justus von Liebig was a
Liebig	German chemist. In 1835
(1803-1873)	he developed a process
	for applying a thin layer of metallic silver to one side of a pane of clear glass. This technique was soon adapted and improved,
	allowing for the mass
	production of mirrors.
	inlight
v	.ht from the sun
can be	dangerous.
• It can	damage our
eyes.	
• We mus	st never look
directl	y at the sun.
• We can	protect our eyes
by we	iring sunglasses
or sun.	hats in bright
sunlig	ht.

۵

If it's completely dark, then there is no light.

When down	nood light?
Why do we	U
We need light.	
The more light	
easier it is to	
Reflectir	<u>rg Light</u>
Shiny objects reflect light.	
Matt surfaces dan't rollast	
don't reflect light very	
well.
