Year 2 – Computing Knowledge Organiser – Information Technology: Strange Creatures
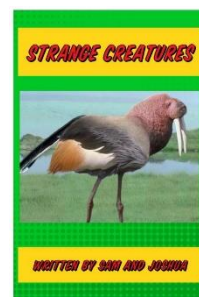

Key Knowledge

- How to locate the address bar, and type a website address into it.
- That we need to choose keywords in order to conduct a search.
- That sometimes we need to refine the keywords we have chosen to find what we're looking for.
- That digital images can be changed (manipulated) to create an effect.
- That digital content can be stored within apps and within the iPad itself.

What software will we use?

images	a picture of a thing or person
screenshot	an image of a display on a screen of a computer, phone or tablet
editing	to change something by adding, removing, correcting or altering something
keywords	a word used to find specific information
search engine	a program that searches for information, used especially for finding particular sites on the internet
navigate	move around, find a path, or travel through something, for example a website
webpage	a document on the internet which usually contains links to other documents
content	information or things that are held on or in something
manipulate	to handle, control, move or change something

Key Skills

- Navigate a simple webpage to get information I need
- Collect images by capturing screenshots and editing them
- Create digital books combining texts, images and sounds
- Use simple keywords in a search engine
- Refine keywords used in a search engine
- Present information on a topic using images, text boxes and voice recordings.

What do I already know?

- How to use the camera app to take photos
- How to view photos using the camera roll
- How to add images to Pic Collage
- How to add text to Pic Collage
- How to use Safari and Google to conduct a simple search
- How to type using one finger, letter to letter.
